DSS: exact normalized model and three-line spectral section
Fixed geminals; d(t)=5.269170t Hz, e(t)=6.597217t Hz; q=0
A Four ordered eigenvalue branches
Normalized energy
Coupling scale t
λ0
λ1
λ2
λ3
B Principal transitions
Frequency / Hz
Coupling scale t
f12
f23
f13
C Solid: bare 3×3; dashed: effective 3×3
Approximation minus exact / Hz
Coupling scale t
D DSS section at t = 1; illustrative amplitudes
Normalized absorption
ZQ frequency / Hz
3.7086
4.6666
8.3752
