Homotaurine: actual trained ASN versus exact analytical reference
Four-input model; selected seed 45; solid/dashed overlap at this scale
A Ordered eigenvalues: exact and learned
Dimensionless eigenvalue
Section parameter t
λ0 exact
λ1 exact
λ2 exact
λ3 exact
B Solid: analytical; dashed: trained ASN
ZQ frequency / Hz
Section parameter t
f12 exact
f23 exact
f13 exact
C Solid: ASN; dotted: quadratic least squares
Predicted minus exact / mHz
Section parameter t
f12 ASN
f23 ASN
f13 ASN
D Homotaurine spectrum; shared illustrative amplitudes
Common amplitude scale
ZQ frequency / Hz
Exact centers
ASN centers
